

ALLOY

GNSS REFERENCE RECEIVER

What's in the box

Description	Description
1 Alloy accessory kit, P/N 109ACC-00	8 Cable – 2 m, Ethernet 10BaseT CAT5, P/N 50150-00
2 Power supply, 65 W, 19 V, 3.43 A, 100-240 V AC, P/N 107000 	9 Antenna 2.4 GHz stick antenna, SMA P/N 120030 
3 Power cord kit – USA, EU, UK, AUS, with a C7 connector, P/N 78651 	10 USB Mini-B Plug Host to A Jack accessory cable, P/N 74399-00 
4 Power cord, 6 ft, Japan with a C7 connector, P/N 78656 	11 USB Mini-B Plug to A Plug accessory cable, P/N 74408-00 
5 Cable – Power, 0.6 m, 7P Lemo-to-SAE, P/N 95715 	12 Tripod clip, EM/TM3, P/N 41124 and Screws 6-32 x ¼ 100FM BLK SS NYL, P/N 27953 
6 Cable – Adapter, 0.15 m, SAE-to-DC socket (2.1 mm), P/N 88769-00. 	13 Smart battery, P/N 76767/176767 
7 Cable – 1.8 m, DB9/M-DB9/F, Data, P/N 19309-00 	14 Heat shrink, P/N 130951 

Connecting the power cable (P/N 95715)

1. Remove the protection cap from either power port 3 or 4.
2. Remove the protection cap from the LEMO end of the cable (5).
3. Connect the SAE adapter (6) to the SAE end of the cable (5).
4. Line up the red dot on the LEMO end of the cable (5) with the red line on the LEMO socket of the respective power port and connect.
5. Connect the DC socket from the SAE adapter (6) to the power supply (2).
6. If required, apply the heat shrink (14) to the above connection.

Display

Description	Description
1 Serial number	5 Firmware version
2 IP address	6 Battery 1
3 Number of satellites and positioning mode	7 Battery 2
4 UTC date and time	8 Logging status

Rotating the display

1. From the **Home** screen, press **↵**. The **System Setup** screen appears.
2. Press the down arrow until **Rotation** is highlighted. Press **↵**.
3. Press **↵** again. The **Rotation** setting is selected.
4. Press the right arrow key to select **Reversed** and then press **↵**. Note that the navigation arrow keys are also reversed.

Setting up the Wi-Fi

1. From the **Home** screen, press **↵**. The **System Setup** screen appears.
2. Press the down arrow key until **Wi-Fi Access Point** is highlighted. Press **↵**.
3. Press **↵** again to activate the **Disable/Enable** setting. If the **Wi-Fi Access Point** is disabled, press the down key to change to **Enable**. Press **↵** to save.
4. Press **Esc** twice to return to the **Home** screen.
5. Open a hand phone and navigate to the **System Settings** and **Wi-Fi** setup.
6. Select the serial number of the current receiver (for example, **AP 5737R0035**) and click to connect. The encryption is **WPA2** (usually automatic). The encryption type is **AES** (usually automatic). Type in the password **abcdeabcde**.
7. Press **OK**. The hand phone should be now connected to the Alloy receiver with a warning that there is "no Internet access".
8. Open a web browser on the hand phone. In the address bar, enter **192.168.142.1**. The Alloy web interface is now open on the phone.

Setting up the Ethernet

1. From the **Home** screen, press **↵**. The **System Setup** screen appears.
2. Press the down arrow key until **Ethernet** is highlighted. Press **↵**.
3. At **DHCP**, press **↵**. The **DHCP** setting is selected. If required, disable/enable DHCP.
4. If DHCP is disabled, using the arrow keys move to the **IP Address** field. Press **↵**. Enter your IP address (for example, **10.3.36.218**).
5. Using the arrow keys, move down to the **Netmask** field. Press **↵**. Enter the required netmask.
6. Using the arrow keys, move down to the **Gateway** field. Press **↵**. Enter the required gateway address.
7. When finished, press **↵** once, then press **Esc** to return to the **System Setup** screen.
8. Restart the receiver for the changes to take effect.
9. Open a web browser on a computer connected to the LAN. In the address bar, enter your IP address (for example, **10.3.36.218**). The Alloy web interface appears.
